

Moodle Interface changes

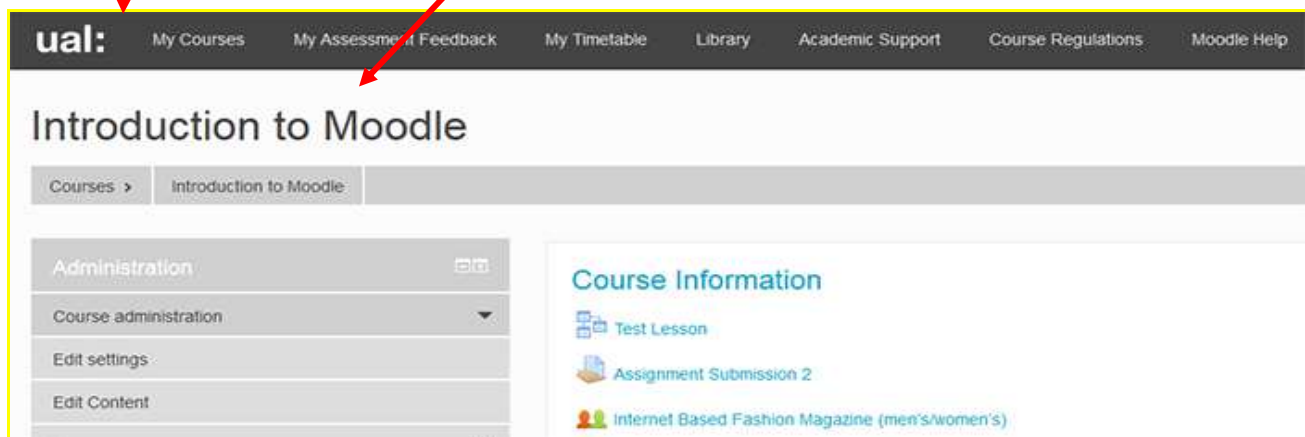

A

The latest changes to the UAL brand required the use of the abbreviated logo. This has allowed us to fit the logo in the navbar, making space for the page (course) title above the breadcrumb. In short:

Before

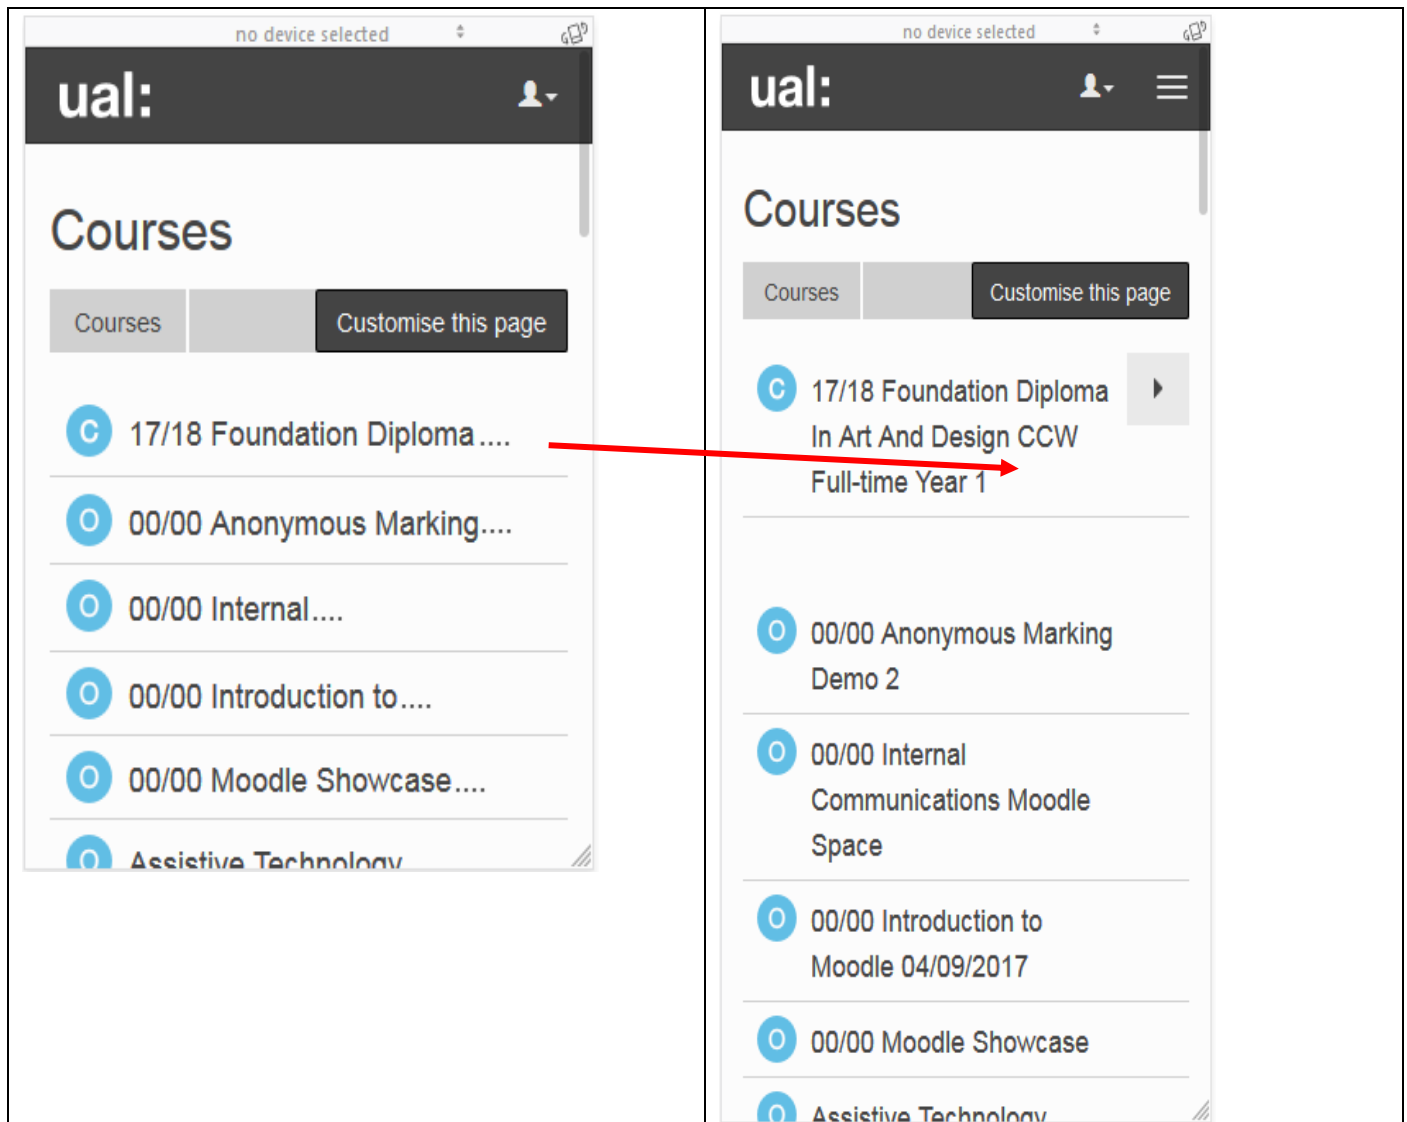

After

B

We have stopped truncating course names in the course list which allows users to easily see the full course name.

C

Issue with emails

Emails from Moodle were set to noreply if the user set their email to hide their email address from other users.

Fix

Hide change password field and email display preferences on profile page..

Further Support

Additional support is on hand should you require help. Contact the Digital Learning Support team at dlsupport@arts.ac.uk
